KEY OUTPUTS & ACHIEVEMENTS
2017-18
ANZPAA
Australia New Zealand Policing Advisory Agency
Priority: 1

ORGANISATIONAL DEVELOPMENT AND CAPABILITY

- Delivered four environment scans identifying emerging issues that may affect police and the strategic considerations to position police for the future.

- Developed the Technology Radar 2018 with a focus on technology as a driver of change.

- Managed the successful Police Conference 2018 on behalf of Police Commissioners (95% satisfaction rating).

- Completed the first annual Trends Analysis Report, which framed discussions at the ANZPAA Board Planning Forum.

- Developed the Australia New Zealand Policing Profession Framework, approved by ANZCoPP.

- Facilitated collaborative procurement opportunities for ammunition and ECDs on behalf of police to identify and maximise cost savings.

- Facilitated the ANZPAA Board Planning Forum.

Priority: 2

OPERATIONAL POLICING PRIORITIES

- Produced environment scans for emerging technologies that may impact the police response to illicit drugs.

- Delivered research reports across varied operational priorities, including:
  - fentanyl
  - police pursuits
  - family violence.

Priority: 3

OPERATIONAL POLICING MODELS AND APPROACHES

- In consultation with jurisdictions and relevant partner agencies, reviewed cross-jurisdictional instruments for:
  - use of force
  - serious and organised crime
  - high-risk situations
  - pursuits
  - emergency management.

- Delivered research reports analysing a range of policing models and approaches, including cohesive density and social cohesion, cross-border challenges and vulnerability stressors affecting communities and police responses.
Facilitated
89 Information Requests on behalf of jurisdictions.

Facilitated
cross-jurisdictional information sharing, senior executive networks and meetings with subject matter experts to inform the range of ANZPAA products and research throughout the year.

Assessed
eight access requests for ANZPAA products.

Worked collaboratively
with jurisdictions and partner networks.

Priority: 4
WORKFORCE CAPABILITY

- Produced the Workforce Demographic Report 2017-18 and analysed Workforce Demographic data for leave, age and separations.

- Developed the Workforce Optimisation Framework, approved for implementation across all jurisdictions by the ANZPAA Board.

- Developed a dashboard model to analyse and present workforce trends in relation to the career cycle of sworn officers.

- Reviewed five ANZPAA Education and Training Guidelines in the areas of Police Manager, Police Negotiation, Active Armed Offender, Intelligence, and Incident and Emergency Management, approved by ANZCoPP.

- Examined diversity and flexible work options in the policing environment.

- Completed the Trial Implementation of the Police Officer Practice Standard and an extensive cost/benefit analysis report.
Facilitated the Joint Specialist Advisory Group Meeting
with over 160 members from 20 ANZFEC agencies and other forensic partners in attendance
to discuss the current and future state of forensic science in Australia and New Zealand.

Australasian Forensic Field Science Accreditation Board
(AFFSAB)
re-certifications processed to maintain forensic science standards across multiple
disciplines.

After the Fact Tests
provided to ensure a quality crime scene proficiency test was delivered.

Forensic Science Workshops
facilitated to provide increased training opportunities for forensic science practitioners,
resulting in significant cost savings to forensic agencies.

Commenced a review of the ANZPAA NIFS Groups
to ensure they are fit for purpose and continue to develop the forensic science disciplines across Australia and New Zealand.

Implementation of AFFSAB Review
recommendations progressed to standardise and streamline the processes across crime scene investigation, fingerprint investigation, and firearm examination programs.

Developed the Empirical Study Guideline
as a resource to assist forensic practitioners in designing or assessing the ability of an empirical study to demonstrate the validity of a forensic method.

Progressed the Facial Identification Project
to develop a Glossary of Terms and guidelines to promote good and interoperable practice in Australia and New Zealand.

Released the Familial DNA Searching Factsheet
as an education and training resource for police investigators.

Developed and released the Research and Innovation Roadmap
as a resource for the forensic science community to focus research and innovation initiatives towards end user requirements and identify opportunities for collaboration.
